

# Compare Adaptations

Write the human activity that each adaptation compares to.

Cheetahs have strong claws that dig into the ground

as they run.

**Human comparison:** Soccer players wear cleats to help them have better traction on the field.

Eagles have a bony ridge above each eye that shades their eyes from the sun.

**Human comparison:**

---

---

Hippos ooze a sticky sweat that protects their skin from sunburn.

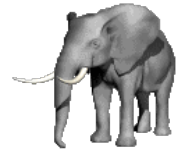

**Human comparison:**

---

---

Elephants leave their long trunks out of the water as they swim so they can breathe.

**Human comparison:**

---

---

Kangaroos carry their babies in special pouches.

**Human comparison:**

---

---

Hummingbirds use their long beaks and tongues to reach deep into flowers and feed on nectar. **Human comparison:**
