

Discover! Home Energy Audit

Sit in one room in your house. Write down five things in the room that use electricity. Then write how you could save energy.

Room: _____

What uses electricity?	How to conserve energy

Ways to Conserve Energy in your Home

- Unplug items when they aren't being used.
- Buy more efficient products such as low-energy light bulbs
- Turn off appliances and lights when they are not being used.
- Make sure windows do not have any air leaks that let hot or cool air inside. Seal any leaks that you find.
